USSR COAL ENTERPRISES FULFILL OR EXCEED PLANS

[Numbers in parentheses refer to appended sources.]

Almost 70 percent of the total number of mines in Stalino Oblast have fulfilled their 5-year quotas ahead of schedule and are already mining coal on the 1951 schedule.

The Kalininugol' Trust, having fulfilled the Five-Year Plan, is delivering tens of trainloads of coal above the plan daily. The Mine imeni Romyantsev is exceeding its daily quota by 450 tons.(1)

Underground trolleys are in operation in many Donbass mines, taking the miners to their place of work. Mines No 29-30 and No 25 of the Voroshilovugol' Trust and Anenskaya Mine of the Kadiyevugol' Trust are among those enjoying such transportation facilities. During 1951, trolleys will start operating in eight more mines of Voroshilovgrad Oblast.(2)

The Moskvougol' Combine completed the year plan for coal output on 25 December in the second shift. Since the beginning of 1950, this combine mined 291,000 tons of above-plan coal instead of the 250,000 tons which constituted its year obligations. Thirty mines in the coal basin and the Oktyabr'skugol' and Krasnoarmeyskugol' trusts also completed the year plan ahead of schedule.(3) The latter trust was the first in the Moscow Basin to fulfill its year quota, achieving this goal on 5 December. The trust has already delivered tens of trainloads of above-plan coal.(4) Mine No 22 of the Stalinogorskugol' Trust completed the postwar Five-Year Plan ahead of schedule. During 1950, this mine delivered 43 trainloads of above-plan coal and its average daily output was 410 tons above that of 1949.(5)

The Gruzugol' Combine completed the year plan for coal output on 28 December (6), while the Tkvarchelugol' Trust of this combine achieved this goal on 8 December and delivered 33.3 percent more coal than in 1949. The trust fulfilled the year plan for shaft sinking and drift cutting 137.9 percent during 11 months of 1950 and its labor productivity was 14.5 percent higher than in the same period of 1949.(7)

50X1-HUM

By 15 December, miners of the Chelyabinskugol' Combine had already shipped more than 300 trainloads of above-plan coal. More than 30 coal enterprises in Kopeysk city are already working on their 1951 quotas. They have delivered 110 trainloads of coal above their quotas and have saved 20 million rubles for the state.(1)

The Karagandaugol' Combine completed the year plan on 21 December and on this same day Mines No 17-bis, 36, and No 50/52 had an output of twice their quotas. Mines No 31, 40, 41/54, and the Mine imeni Zhdanov, as well as many others, are also delivering hundreds of tons of coal above their daily quotas.(8)

The Kemerovugol' Combine delivered the last tons on the Five-Year Plan on 13 December. During 1950, the average daily coal output increased greatly, while mining costs decreased and the quality of the coal mined improved. During 10 months of 1950, the combine saved more than 6 million rubles.(9)

Both the Kok-Yangakugol' and the Kyzyl-Kiyugol' trusts completed the 1950 year plan for coal output ahead of schedule. The latter trust has also completed the plan for development work.(10) The Kapital'naya Mine, the largest mine in the Kokyangakugol' Trust, has already delivered 1,000 tons of above-plan coal. Mine No 40-bis completed the year plan by 16 December and has pledged delivery of thousands of additional tons of coal by the end of the year, a promise which has already been 60 percent fulfilled.(11)

Mines of the Suchanugol' Trust in Primorskiy Kray delivered the last ton of coal on their 1950 quotas on 13 December. Their daily coal output is 11 percent higher than in November and December of 1949, while labor productivity for the same period is 13.8 percent higher. The trust as a whole has considerably exceeded the Five-Year Plan. Mines No 1 and 20 were among the first to fulfill both the year and the Five-Year Plans.(12)
